RE: Emergency Procurement for IP 6000 PA System at Clarke County High School

Recently, due to a power surge and lighting event, the PA system at Clarke County High School is not working as it should.

Due to the need to ensure effective communication throughout Clarke County High School, especially in an emergency situation, Clarke County Public Schools is entering into a contract with Bridgman Communications, Inc. to replace the failed and discontinued Simplex 5100 System with a IP 6000 PA system using an emergency procurement.
